

Daniel Felipe Vargas Ulloa

Nantes, France · (+33) 7 69 97 67 28 · df.vargas@outlook.com · linkedin.com/in/daniel-felipe-vargas

Engineering student in a double-degree program at École Centrale Nantes and University of the Andes, with professional experience in data analysis, signal processing, predictive analytics, anomaly detection, and development of data pipelines. Seeking a 4-month internship starting May 2026 to play a key role in data-driven engineering projects.

EDUCATION

École Centrale de Nantes

Diplôme d'Ingénieur (Master's level Engineering Degree)

Nantes, France

2025 – 2027

- Specialization in Computer Science for Information Systems

University of the Andes

Bachelor's in Systems and Computing Engineering

Minor in Computational Mathematics

Bogotá, Colombia

2021 – 2027

GPA: 4.4 / 5.0

- National Recognition for Top Performance (Colombian Ministry of Education, 2024)

EXPERIENCE

Undergraduate Teaching Assistant, Software Development

University of the Andes

Aug 2024 – Dec 2024

Bogotá, Colombia

- Co-delivered a production-oriented software engineering course focused on designing, implementing, and deploying full-stack applications, emphasizing Angular front-end architectures, Spring-based microservices, and RESTful API development.
- Guided development teams in applying Agile methodologies, Git-based version control, test-driven development, and containerized deployment using Docker.

PROJECTS

Clinical Anomaly Detection in Pediatric Intensive Care Units

Collaboration with Central Military Hospital of Bogotá

Jan 2025 – Jul 2025

- Developed a real-time predictive modeling system to identify early signs of clinical deterioration in pediatric patients using bedside monitor data.
- Designed and implemented end-to-end data pipelines for data ingestion, signal preprocessing, and anomaly detection to support timely clinical decision-making.

Predictive Analytics System for Academic Dropout Risk

Collaboration with National Sports University of Colombia

Aug 2024 – Dec 2024

- Built predictive models and analytical dashboards to identify students at risk of academic dropout and enable early intervention strategies.
- Conducted SQL-based data extraction, feature engineering, and model training, delivering actionable insights through Power BI.

SKILLS

Programming Languages: Python, Java, Go, C++, SQL

Data & Machine Learning: Signal Processing, Data Modeling, Anomaly Detection, Data Pipelines, Model Evaluation

Backend & Data Systems: Spring Boot, Flask, Django, Docker, PostgreSQL, MongoDB, Linux, Git, Google Cloud

LANGUAGES

Spanish – Native · English – C2 (Fluent) · French – B2 (Advanced)
