

# Daniel Felipe Vargas Ulloa

Nantes, France · (+33) 7 69 97 67 28 · df.vargas@outlook.com · linkedin.com/in/daniel-felipe-vargas

Double-degree engineering student at École Centrale Nantes and University of the Andes with industry experience in data analysis, machine learning, and software development. Looking for a Summer 2026 internship starting in May or June and lasting 3-4 months.

## EDUCATION

**École Centrale de Nantes** Nantes, France  
*Diplôme d'Ingénieur (Master's level Engineering Degree)* 2025 – 2027

- Specialization in Computer Science for Information Systems

**University of the Andes** Bogotá, Colombia  
*Bachelor's in Systems and Computing Engineering* 2021 – 2027  
*Minor in Computational Mathematics* GPA: 4.4 / 5.0

- National Recognition for Top Performance (Colombian Ministry of Education, 2024)

## EXPERIENCE

**Clinical Anomaly Detection in Pediatric Intensive Care Units Project** Jan 2025 – Jul 2025  
*Central Military Hospital of Bogotá* Bogotá, Colombia

- Developed a real-time predictive monitoring system to analyze pediatric bedside vital signs, improving recall by 12% and reducing false positive rate by 38.7%.
- Built end-to-end pipelines for data ingestion, signal processing, and detection of early clinical deterioration to support early intervention strategies.

**Predictive Analytics System for Academic Dropout Risk Project** Aug 2024 – Dec 2024  
*National Sports University of Colombia* Bogotá, Colombia

- Developed a dropout prediction model and analytical dashboards that achieved 83% precision in identifying students likely to leave the following semester, supporting targeted academic counseling.
- Conducted SQL-based data extraction, feature engineering, and model training, delivering actionable Power BI insights and highlighting key student profile factors linked to dropout risk.

**Undergraduate Teaching Assistant, Software Development** Jan 2024 – Jul 2024  
*University of the Andes* Bogotá, Colombia

- Co-delivered a production-oriented course on designing, implementing and deploying full-stack applications, with emphasis on React frontends, Spring microservices and REST APIs.
- Guided development teams in applying Agile methodologies, Git-based version control, test-driven development, and containerized deployment using Docker.

## SKILLS

**Programming Languages:** Python, Java, Go, C++, SQL

**Data & Machine Learning:** Signal Processing, Predictive Modeling, Anomaly Detection, Data Pipelines, Power BI

**Backend & Data Systems:** Spring Boot, Flask, REST APIs, Docker, PostgreSQL, MongoDB, Linux, Git, Google Cloud

## LANGUAGES

**Spanish** – Native · **English** – C2 (Fluent) · **French** – B2 (Advanced)
